

CUT-Series

Intermittent Horizontal Cartoning Machine

Maximum flexibility for your secondary packaging

Optimal packaging platform for your products and operator

The CUT Series is distinguished by offering great flexibility in choosing appropriate infeed systems, formats and closure options. The cartoner can easily adapt to different carton sizes and provides a secure and gentle packaging process. In addition, the CUT handles a wide variety of different products – such as bottles, vials, syringes, ampoules, tubes, blisters and trays, as well as bags, stick packs or sachets.

Due to a modular design the machine is capable to run products with different add-ons or inserts, like a spoon, booklet or pre-folded leaflet. Equipped with the appropriate infeed system, the intermittent machine platform is able to run various speeds

and offers newest technology, which brings a benefit for each of our customers in terms of format change-over time, reproducibility and machine access.

Machine Highlights

- Absolute flexibility for infeed systems, formats and carton closures
- Fully servo-driven machine platform
- Servo-controlled pusher can be optimally adapted to the product properties
- Effortless operator accessibility to all components from operator side for easy maintenance
- Large format range (up to A = 165 mm)
- High buffer capacity for packaging materials
- Patented folding carton transport units to ensure gentle handling
- Already prepared for product serialization

Robust and versatile platform

- Reproducible, easy and rapid format-changing combined with outstanding ergonomics and cGMP design
- The swivelling leaflet folder unit ensures easy accessibility

Technical Specifications

Model	CUT 1405	CUT 0711
Output rate (per minute)	140 cartons	70 cartons
Carton dimensions (in mm)	A 20 - 110 B 15 - 100 H 50 - 200	A 50 - 165 B 20 - 90 H 80 - 200
